

FAQ - Single Membership

What is single membership? Single membership integrates PMI and local chapter memberships into one unified package, offering a streamlined experience and enhancing the value by automatically including a chapter membership with a PMI membership.

What is the benefit to existing chapter members? Existing members gain a simplified renewal process, continuous access to chapter benefits, and a consistent experience as chapter membership will be bundled automatically with their PMI membership.

What is the benefit to non-chapter members? Non-members who join PMI will now automatically receive local chapter membership, giving them access to valuable local networking, professional development, and community resources without additional steps or fees.

How will PMI communicate with me as a PMI member? PMI should start informing members about the changes in December 2024, focusing on countries transitioning to the new model in 2025. Communication will include detailed updates on the new membership experience and any changes relevant to existing plans.

Will all chapters in the country need to launch single membership? Yes, for a country to implement the new model, all chapters within that country must meet the required steps and deadlines. If any chapter does not comply, the rollout will be postponed for the entire country.

Can I be part of more than one chapter? Yes, members can join multiple chapters, both within their country and internationally, by purchasing additional chapter memberships at the standard rates.

Do the bylaws change, and what is that process? Yes, changes are needed in the chapter bylaws to align with the new membership model. Please see our website for the original by-laws and the track changes. [Chapter By-Laws | PMI Nova Scotia Website](#)
